

CP26-001286 Stamp Student Union Roof Refurbishment – Phase 1 Hoff Theater Roof Replacement

Site Logistics Plan Key

Union Lane (**red**) has had the lane closest to the building closed since July 7, 2026, and will remain closed for the duration of the project. All work will be finished by August 10, 2026. This closure will cause Union Lane to be one way only. A roofing forklift will be in operation in this area to move materials, and the closed lane will be used to store a dumpster. Dynamic General Contracting will use fencing for this closure.

The sidewalk by Union Lane (**blue**) will also be closed and fenced off starting July 23rd and will remain closed for the duration of the project. It will reopen on August 10th. The entrance under the scaffolding at Union Lane will remain open. A flag person will be on the ground at the entrance to direct or temporarily stop pedestrian traffic when the roofing lift is operating. The operation of the roofing lift will be intermittent.

Scaffolding (**orange**) is installed around all sides of the building that will have roof work. The entrances under the scaffolding at Union Lane and on Fieldhouse Drive will remain open. The scaffolding is for pedestrian safety. There will be flag people on the ground during sensitive periods of the project (loading/unloading of materials, demolition, etc.). The scaffolding will have fencing to prevent climbing.

Fieldhouse Drive will not be affected by this project.

The roofing forklift is estimated to be too short to reach any part of the Purple Line from the site, including the overhead wires.

Dynamic General Contracting will provide flaggers and signage for the lane closure and flaggers for pedestrian traffic when the roofing lift is operating. There will be additional signage at the affected building entrances warning pedestrians to be cautious of the overhead construction.
