

Description:

The purpose of the section is to highlight the current applicable UMCP Design Standards for the design, construction and placement of the required university construction site signage required to identify any under construction.

Effective Date:

- July 10, 2009

General Requirements:

- During construction, contractor shall provide, install and maintain signs for parking, traffic control, direction to project site, detours, construction material deliveries, pedestrian and property signs, vehicle directions, etc. of materials and finish as required by the Maryland Department of Transportation State Highway Administration Standards for Highways and Incidental Structures or approved equal as determined by the University of Maryland.
- Upon completion of the project, the Contractor must remove all such signs and deliver them to the University as directed.
- Refer to the attached drawing that illustrates the current layout design to be used for projects under construction by Capital Projects at the University of Maryland - College Park.

The University System of Maryland is constructing the
